

Sanitation Station

- Simple Setup in Seconds.
- Huge Fleet to accommodate the largest of events.
- 24/7 emergency support.
- Kills 99% of germs on Hands.
- Up to 500 uses on a single fill up.

The Hand Sanitizer Stand is a versatile and convenient solution for keeping hands clean when water is not available. Hand sanitizer kills 99% of germs on hands, including E. coli and salmonella.

The SaniStand is designed for everyone, from young children to rugged construction workers. Built to hold four dispensers and providing 5,000 uses on a single fill-up, it's an ideal solution for large crowds. Each dispenser has a large viewing window to allow quick monitoring of sanitizer levels. The stand is easy to transport and set up thanks to its 30-pound weight when empty. For added stability on-site, water and sand can be added to the base to increase the weight of the unit to more than 200 pounds. The canopy and dispensers can be locked to protect supplies.

For large gatherings — festivals, carnivals, petting zoos, construction sites, and more — the SaniStand will keep everyone's hands germ-free.
