

## 4 Bay Showers

- Quick setup
- Our smallest most compact shower unit.
- Requires just a water connection, 13amp power and drainage connection.
- 24/7 Emergency support.

4 Bay Showers are a great addition to camping events, Sporting events and festivals. These units can be placed almost anywhere needing temporary shower facilities. We offer these units for short and long term hire.

Each Cubicle incorporates a changing area.

The unit requires power, a water connection and either waste tanks or drainage connection. Gas bottles are used to fuel the boilers. Waste tanks can be supplied if required.

Delivery of the 4 bay shower is via 4x4 vehicles. The unit is positioned, levelled and the 4x4 is then drawn away.

- Length 21' (Including draw bar/hitch)
- Width 7' 2"
- Height 10'
- Add 3' for steps
